

ECOCASH INSTANT PAYMENT (EIP) API (USD & ZWG PAYMENTS)

The API Suite Provides for 3 requests as below:

- ◆ Charge Request (Payment)
- ◆ Refund Request (Reversal)
- ◆ Query Transaction

Authentication:

HTTP Basic Authentication is used for every request. Existing Username and password (for ZWG payments) will remain applicable.

Format and Content Type:

The API supports `application/json`

Test Data

Test Merchant Number	789111401
Test Merchant Code	8003
Test Merchant PIN	1234
Test Customer Mobile Numbers	Send email to the EcoCash POC to have your numbers added to the EcoCash test environment

1. Charge Request

Test Endpoint	https://payonline.ecocash.co.zw/ecocashGateway-preprod/payment/v1/transactions/amount
Method	POST
username	ecocash
password	mobiquity

Sample Body:

```
{
  "clientCorrelator": "1763385010",

```

Parameter Description

Parameter Name	Description	Optional/Mandatory
endUserId	(string) Subscriber MSISDN.	Mandatory
remarks	(string) Transaction description	Optional*
amount	(decimal) Amount to be debited from EcoCash.	Optional *
currency	(string) currency identifier as defined in [ISO4217]. “USD” or ”USD” or “ZWG”)	Optional *
referenceCode	(string) Use this field to set your reference code.	Mandatory
merchantCode	(string) As provided from Ecocash	Mandatory
merchantPin	(string) As provided from Ecocash	Mandatory
merchantNumber	(string) As provided from Ecocash	Mandatory
originalEcocashReference	(string) Use this field to parse the original EcoCash reference of the transaction to be reversed. This is mandatory for a Refund transaction	Optional
transactionOperationStatus	(string) Shows the status of the charge request. Possible values are: CHARGED – the initial status of a charge request/transaction COMPLETED – when transaction has been approved by the subscriber FAILED – when transaction has been rejected by the subscriber. NB: A HTTP POST whose body is the amountTransaction is done to the notifyUrl when this field changes to COMPLETED/FAILED.	Mandatory
notifyUrl	(URI) URL used by the API to notify your application about completion of a transaction.	Mandatory
channel	(string) Set this field to WEB	Mandatory
clientCorrelation	(string) uniquely identifies this charge request. Duplicate clientCorrelation value will result in a ServiceError returned.	Mandatory
tranType	(string) Transaction Type Code e.g. MER= Merchant Payment, REF= Refund	Mandatory
countryCode	(string) Use this field to set your reference code.	Mandatory
currencyCode	(string) currency identifier as defined in [ISO4217] (“USD” or ”USD” or “ZWG”)	Mandatory
terminalID	(string) Unique identifier of terminal (POS, mPOS, etc)	Mandatory
location	(string) Used to parse address of physical location of terminal/merchant	Mandatory
superMerchantName	(string) Use this field to set the super merchant name	Mandatory
merchantName	(string) Use this field to set your merchant name in full	Mandatory
reservedField1	(string) Field reserved for future use	Optional
reservedField2	(string) Field reserved for future use	Optional
reservedField3	(string) Field reserved for future use	Optional

reservedField4	(string) Field reserved for future use	Optional
reservedField5	(string) Field reserved for future use	Optional
reservedField6	(string) Field reserved for future use	Optional
reservedField7	(string) Field reserved for future use	Optional
reservedField8	(string) Field reserved for future use	Optional
reservedField9	(string) Field reserved for future use	Optional
reservedField10	(string) Field reserved for future use	Optional

2. Refund Request

Test Endpoint	https://payonline.ecocash.co.zw/ecocashGateway-preprod/payment/v1/transactions/refund
Method	POST
username	ecocash
password	mobiquity

Sample Body:

```
{
  "clientCorrelator": "{{${timestamp}}}",
  "endUserId": "263777222093",
  "notifyUrl": "http://mysite.com/notifyURL",
  "originalEcocashReference": "MP251117.1507.T0528005",
  "referenceCode": "TEST_1701060500009",
  "tranType": "MER",
  "remarks": "Test purchase",
  "transactionOperationStatus": "Charged",
  "paymentAmount": {
    "charginginformation": {
      "amount": 3.00,
      "currency": "USD",
      "description": "Escrow Online Payment"
    },
    "chargeMetaData": {
      "channel": "WEB",
      "purchaseCategoryCode": "Online Payment",
      "onBehalfOf": "Paynow Topup"
    }
  },

"remarks": "Process service request successfully."
```

Production:

- ◆ To migrate to production, if you have existing ZWG API no new endpoints, credentials or merchant details are required - use the existing.
- ◆ If you are new to the API, to get production access please provide signed Test Script and your production merchant details (Code and MSISDN) to EcoCash team.
